

Garteln in Wien (Gardening in Vienna)

Report on behalf of MA49

**Katharina Roth, Ivoneta Diethart, Lisa Doppelbauer,
Gregory Manni and Bernhard Kromp**

Vienna, June 2018

Introduction:

"We are glad for the widespread interest in community gardens and urban farming in our city. Gardening brings us together! And we want that idea to spread. Bio Forschung Austria is a meeting point for all those with an interest in horticulture. Have fun gardening!"

Ulli Sima and **Rüdiger Maresch**

Overview

There are several ways to get fresh vegetables in Vienna. Renting a 20 - 80 m² garden plot and collaborating in a vegetable garden is one such option. Vegetable plots in Vienna are provided by various parties, such as the City of Vienna, "Selbsternte" (self-harvest), or the Central Association of Kleingärtner. In these rented garden spaces, tenants assume the care and harvest of a pre-existing plot, and are supported with expert advice, assistance, and equipment, depending on the location and provider. Every plot is farmed organically with annually rotated vegetables, and some also cultivate less common varieties. Because vegetable plot gardening does not yet have a common name, connecting gardeners with garden providers is difficult. Regardless, the demand for plots is so high that some providers are fully booked before the season begins before there is a chance to spread the word.

For those who are more interested in building communal relationships than growing their own vegetables, there are opportunities to participate in a range of community gardens - working together with people of different backgrounds and generations to create green spaces. In part, these projects are carried out by the Vienna Parks and Gardens (MA 42), Gebietsbetreuungen Stadterneuerung (Urban Renewal Office), and other organizations.

Even without the coordination of the Urban Renewal Office, people still find ways to grow and harvest fresh produce in Vienna. Examples include "Guerrilla Gardening" and the "Mundraub" project, in which public areas are cultivated and harvested independently.

As an alternative to gardening yourself, you can buy fresh produce from Viennese markets, or have ready-made packages of organic produce delivered directly to your door. Free membership at a food co-op is another option.

1 Introduction

Gardening in the city is booming: more and more Viennese want to plant, cultivate, and harvest their own vegetables and consume fresh food, whether in rented garden plots, community gardens, or simply on an open spot of land.

This trend can be observed across Europe, and the City of Vienna is supporting the movement by offering consultation and organizational assistance. In 2016, the city extended its support of the "Garteln in Wien" (Gardening in Vienna) project, a service and information center for gardening and the provision of local vegetables, located at Bio Forschung Austria.

The hope is to supply the city population with fresh vegetables directly from community gardens in their district, and this plan is laid out in the following "red-green" government agreement (an agreement between the Social Democratic Party of Austria and the Green Alternative Party):

Neighborhood gardens will be supported - gardening together promotes social relationships and neighborhood connections within the districts. The aim is to install a community garden in each district. Cooperation in this area should also be found with schools, with the aim of establishing school gardens in each district (in cooperation with the Administrative Office for Education, Integration, Youth, and Human Resources (Geschäftsgruppe Bildung)).

Self-harvest fields give the citizens the opportunity to grow their own organic vegetables. The offer should be extended to private cooperation partners (other farmers with suitable land) in various regions of Vienna.

2 Urban, Suburban, and Private Organizations

Gardening in the city is booming: more and more Viennese want to plant, cultivate, and harvest their own vegetables and consume fresh food, whether in rented garden plots, community gardens, or simply on an open spot of land.

["Garteln in Wien"](#) (Gardening in Vienna) has been set up by the city at [Bio Forschung Austria](#) as a new coordination and support center: city dwellers can learn where to grow their own food in Vienna, and where they can find fresh, locally-farmed produce.

Various departments of the city lease land to provide horticultural opportunities for city dwellers that do not own a private garden. Some examples include the [MA 49 – Forestry Office and Urban Agriculture](#), which provide garden plots and some community gardens, and the [MA 28 – Road Administration and City Construction](#), which provides green spaces along the street for the "Gardening Around the Corner" ([Garteln ums Eck](#)) program. The [MA 42 – Vienna Parks and Gardens](#) sponsor a community garden in every district, lease parking spaces for community gardens, and also provide free assistance in answering [questions about plants](#).

In most districts, people in Vienna can contact the [Gebietsbetreuungen Stadterneuerung](#) (Urban Renewal Office) or the [Lokale Agenda 21 Wien](#) for help in implementing their own ideas for additional urban green spaces. In cooperation with the districts and the Vienna Parks and Gardens (MA 42), these offices help make public spaces greener. In implementing neighborhood gardens in municipal housing blocks, [Wohnpartner Wien](#) is available with advice and assistance. The [Gartenpolyog Association](#) supports the construction of community gardens and assists both new and existing garden groups with expertise in organization, group dynamics, and horticulture. The association also contributes to the promotion and networking of community gardens. As an authority on green buildings, the GrünStattGrau Research and Innovation GmbH is also at your disposal.

[The Umweltberatung](#) (Environmental Council) offers information and extensive visual material, such as brochures and posters, on a variety of ecologically relevant themes. One of their priorities is sustainable horticulture.

2.1 Bio Forschung Austria (Institute for Organic Research Austria)

Bio Forschung Austria is a non-university, non-profit research institute supported by the Forestry and Urban Agriculture Office of the City of Vienna (MA 49). The institute has taken an interdisciplinary approach to organic farming since 1979, and one of its basic principles is the use of its research in dialogue with organic farmers.

Fields of Research and Action:

- Soil as the basis of food production
- Site-specific organic varieties & crop rotation
- Preventative plant protection and natural pest regulation
- Climate and nature conservation in organic farming
- Educational work for rural and urban target groups
- Sustainable food provision for community consumption
- Organic agriculture and horticulture with social benefits

More information about the institute, current research projects, events, and educational offers can be found at bioforschung.at.

Garteln in Wien (Gardening in Vienna)

On May 30, 2016, the scope of organic research in Austria was expanded to include the service and information center for “gardening and the provision of local vegetables.”

“Garteln in Wien” (Gardening in Vienna) is a coordination and support center set up by the city: city dwellers can learn where to grow their own food in Vienna, and also where they can find fresh, locally-farmed produce for purchase. The center offers guidance in establishing garden initiatives, such as first steps, legal forms, costs, points of contact, land, etc.

Another main focus of Bio Forschung Austria is teaching others how to garden: during the garden season, “Days of the Open Garden Door” are offered, as well as courses for beginners and experts, such as “Organic Gardening in Community”. There are also educational offers and workshops for children and youth.

Bio Forschung Austria – Garteln in Wien

- **Address:** Esslinger Hauptstr 132-134, 1220 Wien
 - **Contacts:**
 - Mag. Katharina Roth

 - **Tel.:** 01/ 4000 – 49 160
- Tue & Thu 10 – 12, Mon & Fri 13 - 15

2.2 The Vienna Parks and Gardens (MA 42)

The Vienna Parks and Gardens are currently sponsoring a community garden in every district as part of a one-time payment. In order to receive this grant, the following requirements must be fulfilled: (1) the community garden must be organized as an association, (2) the approval of the district authority must be obtained, and (3) a valid contract must be completed with the landowner. With the verification of these requirements, the sponsor can request a grant as a community garden association. If the request is approved, the association has one year to establish its garden to be eligible for a maximum € 3,600 refund. Community gardens can both be built or improved with this grant funding, and these funding options are currently available in 4 districts.

Plant protection and gardening advice:

The staff of the Plant Protection Department advise on the following topics:

- Diseases and pests on plants inside and in the garden
- Current harmful organisms
- Organic crop protection
- General garden questions:
- Creating a compost heap
- Cutting fruit trees
- Propagation, cultivation and breeding of vegetables, perennials and summer flowers
- Current plant protection work in the Vienna parks
- Informative events of the Vienna City Gardens (video presentations, lectures, etc.)

The Vienna Parks and Gardens (MA 42)

- **Address:** Johannesgasse 35, 1030 Wien

 - Telephone: +43 1 4000-42483
 - 20., Dresdner Straße 81-85, Stiege 2, 6. Stock

2.3 Gebietsbetreuungen Stadterneuerung (Urban Renewal Office)

We are the Urban Renewal Office (Gebietsbetreuungen Stadterneuerung)

Vienna has practiced "soft urban renewal" since the 1970s, carefully renovating and upgrading districts by involving city residents. This approach aims to create affordable housing and increase the quality of life.

The "[Gebietsbetreuungen Stadterneuerung](#)" (GB*) has maintained this method reliably for over 40 years. As a service center of Vienna, the GB offers a wide range of free services, including guidance, information, and project work at the district level.

Currently, the [GB* has five locations](#). They are an active hub in the region, and can answer questions about city residence, living environments, and living together in district communities. All contact details [can be found here](#).

Green Communities

Urban green spaces make the city livable and fulfill important ecological functions. The GB helps implement your ideas in making the city greener. City residents can plant in [Baumscheiben](#) (curb spaces) and other small free plots in their district, or they can become [community gardeners](#). In cooperation with the districts and Vienna Parks and Gardens (MA 42), the GB helps make public spaces more green.

2.4 Wohnpartner Wien

Do you want to beautify your community building with flower beds, or grow vegetables with your neighbors? Wohnpartner Wien is available for all questions regarding gardens in public housing. Every garden project is different, and Wohnpartner Wien offers individual assistance, tuned to the size and scope of a project. From initial ideas, to cost and funding options, to the finished garden, Wohnpartner teams are available for advice and assistance.

[Contact us](#), and learn about:

- General conditions, prerequisites, and approval procedures
- Assistance with channels of communication
- Assistance with organizational requirements
- Conducting informative events on site
- Existing garden projects in which Wohnpartner was/is involved
- Questions on acquiring grants and donations
- Advice and assistance on holding meetings and celebrations
- Horticultural questions (workshops, garden afternoons, etc.)
- Assistance in group dynamics
- Conflict prevention: assistance, from conflict resolution to mediation

Since 2011, Wohnpartner Wien has offered public housing residents the opportunity to start their own garden beds. It supports ambitious gardeners as well as beginners, from first steps to flourishing gardens and vegetable beds. There are several different [ways to garden, including flower beds, mobile beds, and community gardens](#).

<https://www.wohnpartner-wien.at/ueber-uns/Contact Information/>

2.5 Lokale Agenda 21 (Local Agenda 21)

Lokale Agenda 21 (Local Agenda 21) follows the principle of sustainable urban development. It offers city residents many different opportunities to shape their neighborhoods and districts, and gives them a say in changes large and small. The key members of Lokale Agenda 21 are dedicated citizens, district politicians, and the agenda office, which provides advice and support. The goal is to develop and implement projects together in dialogue to build a better quality of life.

For residents of Vienna that want to become active in community gardens, local food distribution, or other projects, Lokale Agenda 21 can help with networking, project development, and organizational matters, such as finding suitable land, getting permits, etc.

Lokale Agenda 21 is currently operating in ten districts of Vienna:

Innere Stadt
Landstraße
Wieden
Josefstadt
Neubau
Alsergrund
Favoriten
Währing
Donaustadt
Liesing

<http://www.la21wien.at/>

2.6 DIE UMWELTBERATUNG Wien (Eco Counseling Vienna)

“DIE UMWELTBERATUNG” (Eco Counseling Vienna) is *the* primary center for ecological living and industry in Vienna, with information on topics from garbage to grasshoppers. In addition to gardening tips for the green thumb, “DIE UMWELTBERATUNG” environmental consultants instruct on gardening with organic methods, like how to stop garden pests, or help bees and other pollinators thrive. Other topics include organic plant protection and the selection of plants for gardens and small urban spaces, like a window box or a green facade. They also give practical tips on compost and mulch, as well as information for vegetable bed gardening, like organic seeds, plant mixes, and producing a rich harvest. They have recipes on preserving and cooking with herbs and fruits as well.

“DIE UMWELTBERATUNG” environmental consultants provide one-on-one advice on their **hotline: 01 803 32 32**. Their **website** has comprehensive information and brochures, as well as sources for organic gardening products: www.umweltberatung.at

The “biologisch GÄRTNERN” (organic gardening) seal of quality identifies plant protection products, fertilizers, and substrates that meet organic criteria. These can be found in the “biologisch GÄRTNERN” product database: biologisch-gaertnern.at

DIE UMWELTBERATUNG

- **Address:** Buchengasse 77/4 1100 Wien
 - Open hours
 - Mo-Th 09.00 - 15.00
 - Fr 09.00 - 12.00
- **Contact Information:**
 - **Email:** service@umweltberatung.at
 - **Web:** www.umweltberatung.at
 - **Tel.:** 01 803 32 32

2.7 Gartenpolylog

The Gartenpolylog Association was founded in 2007 with the goal of popularizing communal gardening in Austria, implementing community gardens, and creating a network across Austria. Gartenpolylog works in three core areas:

Community Gardens

For the Gartenpolylog team, urban gardens are part of a social change. Its aim is to promote the idea of community gardens in Austria, and assist in their implementation. In Vienna, private clients, self-organized groups, and various city institutions construct community gardens together. Gartenpolylog helps these new garden groups with horticultural knowledge and organization during their first month.

Education

Community gardens are seen as diverse spaces for learning and action, which meet people where they are. Gartenpolylog aims to turn the possibility of communal gardening into a reality by offering courses on topics such as gardening techniques, compost, organization, and group dynamics, as well as excursions to various gardens. Its courses and consultation help provide a structure for research projects and partner collaboration, which promote learning in the community garden environment.

Network

Community garden initiatives are numerous and diverse. Gartenpolylog provides easy access to these initiatives and provides networking opportunities with an interactive [garden map](#), networking meetings, a newsletter, and an annual network conference. More information can be found on their homepage: www.gartenpolylog.org

Offers: <https://gartenpolylog.org/de/gartenpolylog-angebot>

Events: <https://gartenpolylog.org/events>

2.8 GrünStattGrau Research and Innovation GmbH - The Center for Green Urban Development

GrünStattGrau is: the holistic center for green development.

Making buildings green often sounds more complicated than it really is. As an authority center for green development, we are concerned with bringing people together to advance innovation and transformation. With the support of our network partners in business, science, and management, we would like to help you implement greenery in your interior, roof, or facade.

GrünStattGrau provides: know-how, tools, and infrastructure.

GrünStattGrau has the character of a laboratory, with expert advice, opportunities for collaboration in R&D, and exclusive service offers, as well as easy access to partners and infrastructure like online platforms, mobile test tracks, and other experimental spaces.

GrünStattGrau has: a comprehensive network of supporters.

With its partners in business, science, and management, and with growing collaboration in the cities of Vienna, Graz, St. Pölten, Linz, and Feldkirch — GrünStattGrau acts as Austria's ambassador for green development.

GrünStattGrau wants: to bring people together to drive implementation by sharing expertise.

As a promoter of innovation, GrünStattGrau pushes holistic strategies for climate change adaptation through green urban development in Europe.

GrünStattGrau is 100% owned by the non-profit Verband für Bauwerksbegrünung Österreich (Association for Green Urban Development, Austria).

GrünStattGrau Research and Innovation-GmbH

- **Address:** Favoritenstraße 50, 1040 Wien
- **Contact Information:**
 - **Email:** office@gruenstattgrau.at
 - **Web:** www.gruenstattgrau.at
 - **Tel.:** 0650 634 96 31

3 Selbst Garteln (Gardening for Yourself)

In Vienna, there are many possibilities for people without private gardens, and renting a 20 – 80 m² [Gemüsepachtparzelle](#) (vegetable plot) from an agricultural business is one of them. Tenants are chosen each gardening season, and are supported with expert advice, assistance, and equipment, depending on the location and provider. Every plot is farmed organically.

For those who are more interested in building communal relationships than growing their own vegetables, there are opportunities to participate in a range of [community gardens](#), to work together with people of different backgrounds and generations to create green spaces. In part, these projects are carried out by the [Gebietsbetreuungen Stadterneuerung](#) (Urban Renewal Office), [Agenda 21](#), [Gartenpolylog](#), and other organizations.

Those who want to contribute to improving the living environment can do so by sponsoring small green spaces (up to 50 m²) with the "Gardening Around the Corner" ([Garteln ums Eck](#)) program. In addition, there are creative garden initiatives in public places, which use vertical surfaces or home-made planters for gardening, as well as [initiatives just for children](#).

Even without the coordination of the Urban Renewal Office, people still find ways to grow and harvest fresh produce in Vienna. Examples include "[Guerilla Gardening](#)" and "[Obst im öffentlichen Raum](#)" (Fruit in Public Spaces), in which public areas are cultivated and harvested independently.

Those who only want to help selectively (and leave the rest to the professionals), can participate in "Community Made Agriculture" or work on a farm for food and lodging - Vienna offers these opportunities too.

3.1 Gemüse-Pachtparzellen (Vegetable Plots for Rent)

Vegetable plots in Vienna are provided by various parties, such as the City of Vienna, "Selbsternte" (self-harvest), or the Central Association of Kleingärtner, all using the same basic concept. An agricultural firm rents out 20 - 80 m² vegetable plots during the garden season to anyone interested. Most of the plot is already planted with vegetables when the tenant takes over, however, tenants can plant whatever they like on the rest of the plot, with a few guidelines. Every plot is farmed organically. When tenants assume the care and harvest of a plot, they are supported with expert advice, assistance, and equipment, though this is dependent upon the location and provider. Because vegetable plot gardening does not yet have a common name, connecting gardeners with garden providers is difficult. Regardless, the demand for plots is so high that some providers are fully booked before the season begins, before there is a chance to spread the word.

3.1.1 Ökoparzellen, Stadt Wien (Gardens Plots in the City of Vienna)

Each 40 and 80 m² garden plot is cultivated with a wide range of organic vegetable seeds and seedlings by farm staff. The garden plots are located in the 22nd district on Bio-Zentrum Lobau's arable land. They are farmed organically and approved by Austria's Organic Control Board.

At the beginning of the garden season in May, the garden plots on site are assigned to gardeners, who then assume the care and harvest of the land. At first frost near the end of October, the plots are returned to the care of Bio-Zentrum Lobau to be prepared for the following year. The City of Vienna has offered this garden plot system since 1991.

Garden Plots in the City of Vienna

- **Address:** close to Esslinger Hauptstraße 134, 1220 Wien
- **Sponsoring Organization:**
 - Administration: Forestry Office and Urban Agriculture (MA 49);
 - Maintenance of arable land: Bio-Zentrum Lobau
- **Size and Price:**
 - 40 m² € 75,-
 - 80 m²: € 150,-
- **Responsibility of the supervisor:**
 - Planting and seeding
 - Irrigation
 - Water tanks for additional watering
- **Harvest/Use Time:** beginning of May – end of October
- **Cultivated Varieties:** carrots, peas, bush beans, lettuce, cabbage, kale, tomatoes, kohlrabi, and much more; members may grow their own vegetables, herbs, and flowers, as long as they are organic and non-GMO.
- **Contact Information:**
 - **Email:** lb@ma49.wien.gv.at
 - **Web:** <https://www.wien.gv.at/umwelt/wald/parzellen.html>
 - **Tel:** 01 712 24 99

3.1.2 Selbsternte-Parzellen (Self-Harvest Plots)

Self-harvest farming began in the late 1980s in response to an increasingly anonymous agricultural industry, and due to the desire for insight and active participation in food production. In 1987, the first self-harvest sites were launched in and around Vienna.

The owners of self-harvest plots are primarily farmers, who provide tilled urban land and organic seeds. At these plots, regulated organic farming is required of both the land-suppliers and the tenants. In the spring, tenants pay an annual fee for a prepared garden plot, and from that point on, they assume the care and harvest of their plot. When the season ends in late October, the plots are returned.

The self-harvest concept promotes both designing a garden with herbs and flowers, and getting to know other tenants—so plots are kept open and free, without fences. Some farm locations offer workshops and events, but there is also a brochure on the Selbsternte website for more information. Besides Vienna, these self-harvest gardens are also available in Lower Austria, Salzburg, and Styria, as well as Germany (see www.selbsternte.at).

Selbsternte Wien – Hirschstetten

- **Address:** Hirschstettner Straße 85, 1220 Wien
- **Sponsoring Organization:** Manfred Radl jun.
- **Size and Price:**
 - 40 m²: € 180,-
 - 80 m²: € 340,-
- **Responsibility of the supervisor:**
 - Planting and seeding
 - Irrigation
- **Harvest/Use Time:** May through November – weather dependent
- **Cultivated Varieties:** beans, broccoli, dill, Iceberg lettuce, peas, carrots, kohlrabi, cabbage, corn, chard, parsley, radishes, red beets, lettuce, onions.
- **Events:**
 - Bio-Erdbeerenverkauf – Organic Strawberry Sale
- **Contact Information:**
 - **Email:** info@biohof-radl.at
 - **Web:** www.biohof-radl.at
 - **Tel:** (43) 699 15164061

Selbsternte Favoriten/Unterlaa on Kirchenacker

- **Address:** Klederingerstraße towards Johanneskapelle in Unterlaa, 1100 Wien
- **Sponsoring Organization:** Christine Taschner – Markus Sandbichler GesbR Biologische Landwirtschaft
- **Size and Price:**
 - **Area** Plot (latin: Bed), 20 m²: € 109, -
 - **Hortus** Plot (latin: Garden), 32 m²: € 149, -
 - **Campus** Plot (latin: Field), 44 m²: € 198, -

Each respective plot size can be doubled with the additional "**Extensio**" Package. The seasonal price for the second plot is 20% off.

- **Responsibility of the supervisor:**
 - Soil cultivation (shredding, plowing, harrowing) & fertilizing
 - Planting and seeding
- **Harvest/Use Time:** Beginning of May until October 26 – weather dependent
- **Cultivated Varieties:** tomatoes, peppers, lettuce, peas, green and yellow bush beans, black beans, red beets, yellow beets, chard, spinach, carrots, parsnips, parsley, celery, cucumber, zucchini, squash, radishes, kohlrabi, dill, onions

The garden reserves the right to smaller construction-related changes, as well as the following space per plot type for seeding or planting additional crops: 6,5 m² (Area), 10,4 m² (Hortus), and 14,3 m² (Campus)

In addition:

For every plot, **5 kg of organic potatoes** will be offered in the fall.

Tenants of "Campus" plots will also receive **3 kg of Hokkaido-squash**.

- **Events, offers, and other info:**
 - Info-nights and meetings
 - Seedlings for individual part of the plots
 - Nearby playground and rest area with benches
- **Contact Information:**
 - **E-Mail:** office@kirchenacker.at
 - **Web:** www.kirchenacker.at
 - **Tel:** (+43) 0664 4324327
 - **FB:** www.facebook.com/kirchenacker/

Selbsternte Hietzing, Angermayergasse

- **Address:** Angermayergasse 3, 1130 Wien
- **Sponsoring Organization:** natürlich & wild – Renate Weber KG
- **Size and Price:**
 - 31 m² € 192,-
 - 45 m² € 254,-
- **Responsibility of the supervisor:**
 - Soil cultivation (shredding, plowing, harrowing) & fertilizing
 - Planting and seeding
- **Harvest/Use Time:** End of April/beginning of May until the end of October – weather dependent
- **Cultivated Varieties:** salad tomatoes, cocktail tomatoes, green and yellow peppers, green and yellow bush beans, spinach, dill, 2 kinds of cucumber, 2 kinds of squash, green and yellow zucchini, garden peas, sugar peas, chard, root and leaf parsley, carrots, red and yellow onions, red beets, parsnips, 2 kinds of radishes, green and red lettuce, kohlrabi, Indian corn
- **Events:**
 - Garden courses (on request)
 - Plant sale in Mödling
- **Contact Information:**
 - **e-Mail:** selbsternte@natuerlichwild.at
 - **Web:** www.natuerlichwild.at
 - **Tel:** (+43) 699 108 87 205

Selbsternte Hietzing, Trazerberggasse

- **Address:** Trazerberggasse 55, 1130 Wien, at the lower End of "Roter Berg", Entrance corner Trazerberggasse/Meytensgasse

3.1.3 Öko-Erntelandparzellen, ZV Kleingärtner (Eco-Harvest Plots)

The Central Association of Kleingärtner offers organic vegetable plots (115 m²) for rent, where tenants can plant seeds in any free, unused rows. They also have the opportunity to freely design about 20m² of the garden, with the exception of a few species. In most plots, tenants can also rent an adjacent section of the garden with herbs and berry bushes. While the vegetable plots have different crops every season, this area for tasting berries and herbs is permanent. Community sheds, equipment, and portable toilets are provided, as well as tips and tricks from experts of the Central Association, who are regularly on site.

Öko-Erntelandparzellen of the ZV Kleingärtner

- **Address:** Lavantgasse – Gerasdorferstraße, 1210 Wien
- **Sponsoring Organization:** Zentralverband der Kleingärtner Österreichs
- **Size and Price:**
- 70 m² Vegetable Plot - € 115,-
- 115 m² Combo-Plot (70 m² vegetables, 20 m² free, permanent berry bushes and herbs) - € 200,-
- **Responsibility of the supervisor:**
 - Planting and seeding
 - Irrigation in very hot weather
 - Provision of various tools
 - Community huts and toilets
- **Harvest/Use Time:** Gardening season
- **Cultivated Varieties:** tomatoes, hot chili peppers, peppers, melons/squash, zucchini, potatoes, kale, Brussels sprouts, knob celery, white cabbage, red cabbage, garden leeks, cauliflower, broccoli, kohlrabi, green lettuce, bush beans, red beets, chard, dill, parsnip, salsify, onions (several varieties), carrots, parsley
- **Events, offers, and other info:**
 - Permanent berry bushes and herbs are available
 - Tips and tricks by experts on site
- **Contact Information:**
 - www.kleingaertner.at/service/okoernteland.htm

3.1.4 Pflückgarten Haschahof

The Pflückgarten sees itself as a community for all who love to experience nature directly. Farmers prepare the field, then plant and grow vegetables (about 15 different species), all based on the principles of organic agriculture. Anyone who loves the outdoors is welcome to rent a garden plot and harvest their own vegetables. (Season: May - October).

The farmer's market is also a great place to spend time in the garden; it has organic products that you won't find growing in the plots. Opposite the market is a playground and chicken coop, as well as space for wheelbarrows, watering cans, and tools for the garden.

The Pflückgartenfeld is located on the right bank of the Liesingbach River, east of the former "Pottendorfer Linie" railroad embankment.

Pflückgarten Haschahof

- **Address:** Liesingbachstraße 211, 1100 Wien
- **Sponsoring Organization:** DI Rudolf HASCHA
- **Size and Price:**
 - Ca. 45 m²: € 200,-
- **Responsibility of the supervisor:**
 - Planting and seeding
 - Tilling
 - Fertilizing
 - Irrigation
 - Provision of various tools
- **Harvest/Use Time:** May – October
- **Cultivated Varieties:** potatoes, carrots, onions, red beets, lettuce, leeks, yellow beets, chard, cucumber, squash, zucchini, green beans, radishes, leaf parsley, tomatoes, chard, peppers
- **Events, offers, and other info:**
 - Playground
 - Farmer's market
- **Contact Information:**
 - **E-Mail:** abhof@haschahof.at
 - **Web:** www.haschahof.at
 - **Tel:** +43-664-88 44 54 39

3.2 Community Gardens

In community gardens, people of the neighborhood actively garden together. Here, vegetables, fruit, and community collaboration are given the opportunity to flourish. People of all ages and backgrounds meet and get to know each other—the joy of gardening brings fresh food and enriching connections. In some community gardens, intercultural gardening takes a central role, while others involve schools and kindergartens.

Most community gardens are intended for long-term use, but temporary spaces can be a great place for gardening too. Membership is required for most community gardens, but there are also opportunities where everyone can participate. For example, all are welcome to stop by the Naschgarten in the 21st district to lend a helping hand or taste the garden's bounty.

The City of Vienna actively serves and financially supports the development of community gardens. To learn more, see "Organizations."

2nd District:

Urban Gardening - Beete beim Augarten (Beds by the Augarten)

- **Address:** close to Obere Augartenstraße 46, 1020 Wien

3.3 Gardening in Vienna Public Housing

Since 2011, Wohnpartner Wien has offered residents of public housing the opportunity to start their own garden beds. It supports ambitious gardeners as well as beginners, from first steps to flourishing gardens and vegetable beds. There are several different ways to garden, including flower beds, mobile beds, and community gardens.

Flower beds...

are small plant beds in the housing complex, maintained by individual residents.

Recommended:

- Enjoy plants and be ready to garden!
- Be willing to abandon fruits and vegetables

Mobile beds...

are raised beds placed in the housing courtyard at request, cared for by residents.

Recommended:

- Find neighbors to join in the work
- Set aside enough time for planting, maintenance, and harvest
- Be willing to look after a neighbor's garden or share a raised bed
- Be tolerant of garden damage, such as a missing vegetable or plant

Community gardens...

are spaces where residents of a housing complex can garden together.

Recommended:

- Involve neighbors who are enthusiastic gardeners like you
- Be willing to start a garden association
- Be ready to engage in group dynamics
- Be creative!
- Be open to diversity, different opinions, and outside perspectives

Wohnpartner Wien is available to assist with the garden approval process and community conflict prevention, as well as general advice.

<https://www.wohnpartner-wien.at/zusammenleben/gaerten-garteln/>

<https://www.wohnpartner-wien.at/ueber-uns/Contact-Information/>

3.4 Garteln ums Eck (Gardening Around the Corner)

Active residents can plant in the small open spaces of their neighborhood (up to 50 m²) and contribute to bettering the living environment. In cooperation with the district and Wiener Stadtgärten (Vienna City Gardens, MA 42), the Gebietsbetreuungen Stadterneuerung (Urban Renewal Office) helps add green to public spaces.

 - Parking lot becomes free space with pallets from May – September
- **Participants:** Hinterlans
- **Contact Information:**
 - **Email:** info@krongarten.at
 - **Web:** <http://www.krongarten.at/>
 - **Tel:** 01 58 123 59

3.6 Bauwerksbegrünungen (Building Greening)

Building greening carries a crucial role in improving the city climate, as it serves many helpful functions. In tight living situations where green is lacking and land is in high demand, green roofs and facades raise the quality of life and have a positive impact on wellbeing and health.

Well-designed, species-rich, green spaces give animals and insects more room to live within the city, playing an important role in urban biodiversity, as well as raising the aesthetic and physical worth of a property. These spaces also create large drainage and storage areas for rainwater, and as water evaporates across plants and substrates, the surrounding air cools, reducing the city's thermal pollution. They are also resistant to extreme heat and cold, which lengthens the life of the buildings they rest upon. Urban greenery can be applied and constructed in many ways, so there are solutions that either cost little, or are extensive in their maintenance.

As the center for green urban development, GrünStattGrau Research and Innovation GmbH is available to help with any urban greening projects.

3.7 Garden Initiatives for Children

Practice starts early for those who want to become urban gardeners!

There are a few initiatives, made especially for children, which provide the opportunity for hands-on learning in the garden.

There are other opportunities for children too, such as "[Eule Wien](#)" (Owl Vienna) or "[Schule am Bauernhof](#)" (School on the Farm).

Kinder-Garten! Pädagogikgarten (Education Garden)

Practice starts early for those who want to become urban gardeners! In this garden program, kids learn that plants need time and care to grow into ripe, delicious food. But the highlight for these little gardeners is always the harvest: when the vegetables can be tasted, herbs gathered, and berries picked, patience is finally rewarded!

The Pädagogikgarten (educational garden) is an ideal opportunity for children of the city to see where fruit and vegetables come from, and to learn how they arrive on our table. Come visit the garden and enjoy the flourishing garden beds!

Kinder-Garten! - Pädagogikgarten

- **Address:** Schütte-Lihotzky-Park, 1050 Wien
- **Size:** 5 children's raised beds
- **Sponsorship:** GB*East, Bezirksvorstehung, MA 42
- **Established:** 2015
- **Participants:** Childrens groups from KIWI, Kleiner Stern Abendstern
- **Plants:**
 - Vegetables, herb, and flower beds
- **Events:**
 - Spring festival
- **Contact Information:**
Email: ost@gbstern.at

Mädchengarten (Girl's Garden)

Since 1997, Vienna's Mädchengarten has been a place used and defined by women and girls. The project was initiated by the "Wirbel" Association, but was taken over by BALU&DU in 2008. The garden is open for all young women one to two afternoons a week, and can be used for anything, from gardening to crafts. With supervision, girls and their friends from all over Vienna can rent the garden for parties, dancing, and games. This community project gives young women a space that is not occupied by men, so that they can realize their own wishes and ideas. At a garden meeting in 2003, there was a deep discussion over gendered socialization, female use of space, and spatio-structural conditions in open public spaces. These topics are very important to the Mädchengarten, as well as networking with international projects through a platform that deals with open public spaces for girls.

Mädchengarten in Wien

- **Address:** Rear garden section of the Szene Wien -Lorygasse/Rautenstrauchgasse – at foot and bike path „Am Kanal“, 1110 Wien
- **Sponsorship:** Verein Balu&Du, Szene Wien, MA 57
- **Participants:** Young women and girls
- **Gardening Season:** Beginning of April – end of September
- **Cultivated Plants:**
 - Vegetable, herb, and flower beds
 - Grapes, plums, and currants
- **Events, offers, and other info:**
 - Open every Tuesday from 15.00 - 19.00 – all interested can simply stop by
 - From October – April, there are special offers for girls with the local club Balu&Du in Simmering
 - Hammocks, picnic tables
 - Huts
 - Power supply
 - WC
 - Various game materials
 - Punching bag
 - Wading pool
 - Tree house
 - Grill
- **Contact Information:**
 - **Email:** garten@parkbetreuung.at
 - **Web:** <http://www.mädchengarten.at>
 - **Tel.:** 0650/30 61 562

City Farm Schönbrunn

City Farm Schönbrunn is an urban adventure garden with a diversity of vegetables, and is the first children's garden in Vienna. The grounds of the historic Kammermeierei Schönbrunn are covered by a meadow that spans 4,000 square meters, and also holds themed garden beds surrounded by orchards and a fairytale forest. There is a wide spectrum of garden programs for children, teenagers, and adults year-round.

City Farm Schönbrunn

- **Address:** Seckendorff-Gudent-Weg 6, 1130 Wien
- **Sponsorship:** Verein City Farm Schönbrunn - Verein zur Förderung von Urban Gardening, Gartenpädagogik und ökologischer Bildung (Association for the Promotion of Urban Gardening, Garden Education, and Ecological Education)
- **Target Groups:** Adults, children, families, school classes, kindergartens, and teachers
- **Gardening Season:** year-round
- **Events, offers, and other info:**
 - Programs for adults, children, families, school classes, kindergartens, and teachers
 - Raritätenbörse ("Treasure Fair")
- **Contact Information:**
 - **Email:** info@cityfarm.wien
 - **Web:** <http://www.cityfarm.wien>
 - **Tel.:** 01 8135 950 215

NALELA – Space for Knowledge and Nature

Nalela is an educational workshop on a farm in the middle of Lobau. It is a place for people of all ages who seek to learn from nature—such as getting up close to farm animals, or producing natural cosmetics.

NALELA – Place for Knowledge and Nature

- **Address:** Naufahrtweg 14, 1220 Wien
- **Gardening Season:** year-round, dates by appointment
- **Duration:** 2 to 3 hours (workshops), all day (farm holidays)
- **Target Groups:** Kindergartens, children's groups, families, adults, and seniors
- **Events, offers, and other info:**
 - Many different workshops for every target group
 - All-day support during Summer, Easter, and semester holidays
 - Birthday parties
- **Contact Information:**
 - **Email:** info@nalela.at
 - **Web:** www.nalela.at
 - **Tel:** 0681 / 818 508 86

Experience diversity in the garden of BIO FORSCHUNG AUSTRIA

What do plants eat? How deep do roots reach into the soil? What does "organic" mean? In "Garten der Vielfalt" (Garden of Diversity), students learn about the amazing wealth of edible plants. Depending on the season and program, students can plant or harvest peas, smell culinary herbs, taste tomatoes, or dig up potatoes to take home. There are about 200 different species of plants to admire.

A healthy variety of vegetables needs a rich soil life: educational stations show the movement of earthworms, microscopic microbial communities, and the secret underground life of plants in the "Wurzelschaugarten" (Root Garden).

Experience the foundations of our diet in the organic garden!

Garten der Vielfalt (Garden of Diversity)

- **Address:** Esslinger Hauptstr. 132-134, 1220 Wien
- **Size:** ca. 1,5 ha
- **Supervised by:** Bio Forschung Austria
- **Gardening Season:** April-October, Monday to Friday – dates by appointment
- **Duration:** about 2 hours for elementary schools, and 3 hours for students above 5th grade
- **Target Groups:** Students aged 5-18, as well as **children and adults!**
- **Cultivated Plants:**
 - Fruit, vegetables, cereals, herbs, plants for promoting pollinators, green spaces
- **Events:**
 - Tage der offenen Gartentüre – Day of the Open Garden Door
 - Organic gardening course
 - Tag der Artenvielfalt – Biodiversity Day
- **Contact Information:**
- **Email:** schulklassen@bioforschung.at
- **Web:** [BFA – Workshops für Schulklassen](#)
- **Tel:** 01-4000-49 160 (Tue, Thu 10:00 – 12:00, Wed, Fri, 13:00 – 15:00)

3.8 Obst im öffentlichen Raum – Mundraub und Fruchtliege (Fruit in Public Spaces)

Mundraub is an online project of TerraConcordia gUG, which maps publicly accessible fruit trees with Google Maps and publishes their locations. The sites of wild, unused, or public fruit trees, berries, and herbs can be registered and accessed by any user on an interactive map. Some basic rules call for respecting private property, taking care not to harm the trees and the surrounding flora and fauna – in short: to behave fairly. Since launching in 2009, more than half a million people have accessed the site, and several hundred are actively working on the online fruit tree map.

Fruchtliege is an app for all common smartphones. The Fruchtliege app makes it easy to find fruit trees on public land. Orchards can be found everywhere on the countryside, but fruit isn't so easy to find in the city. Our maps contain the locations of fruit trees found by our users, as well as open administrative data (data.wien.gv.at) of the Wiener Stadtgartenamtes (Vienna City Gardens). The locations are sorted by fruit type and harvest time, indicate size and geo-reference, and also include kitchen tips!

3.9 Community Made Agriculture (CMA)

"Community Made Agriculture" is a special form of collective agriculture that has developed in Vienna. Here, people try to subsist on their own garden of vegetables, herbs, and sometimes even fruit, and also use the garden as a political and socio-economic statement. The CMA motto is, "do not live at the expense of others! – not at the expense of nature, and not at the expense of people in low-wage countries."

The owner of the farmland is only involved in this form of solidarity farming through the land tenancy, and sometimes infrastructure, such as greenhouses, access to water, etc. CMAs are organized like community gardens, but produce food both for sale and for personal use.

In order to grow vegetables as efficiently as possible, all plants of one kind are put into the same bed, sometimes in a system of mixed crops. For example, one plant bed might only be used for onions and carrots for the whole community. Members share the responsibility of garden care by choosing the specific vegetables they wish look after for the entire season, and the more responsibility a member takes on, the more they get to harvest.

LaaerBergbauern – Eco-social agriculture at Laaer Berg in Vienna

A CMA was established at Laaer Berg in 2017, where local organic vegetables are produced through community work and division of labor. Laaer Berg farmers want members to contribute ecologically, politically, and socially through meaningful participation and responsibility as "prosumers" on a piece of land. Together, the community creates a beautiful place for the whole family, where people can engage in healthy outdoor activity. Anyone interested can become members, adopt a tree, or participate in intercultural exchanges, such as sightseeing tours, field days, and festivals.

- **Address (Association Office):** Kempelengasse 16/44, 1100 Wien – Land in Laaer Wald-Vogental
- **Field Days:** Sat 10:00 – 17:00
- **Contact Information:**
 - **Email:** Post@LaaerBergbauern.Wien
 - **Web:** <http://www.laaerbergbauern.wien>
 - **FB:** <https://www.facebook.com/Gemeinsame-Landwirtschaft-am-Laaerberg-1974403482787243/>
 - **Tel:** 0699 111 76565

Wilde Rauke

"Gemeinsame Landwirtschaft Wilde Rauke" (Wilde Rauke Collective Agriculture) is a self-organized community garden in Stammersdorf. At a picturesque location on the Marchfeld Canal, the members work sustainably and organically on one hectare of land, where a variety of vegetables and fruits are harvested. Working together is one special feature of the community garden: from soil cultivation to seeding, plant care, watering, and harvesting — everything is done as a community.

- **Address:** Association Office: 1210, Cordobaplatz 1/5/27
- **Established:** May 2012
- **Contact Information:**
 - **Email:** wilderauke@gmx.at
 - **Web:** www.woof.at

Die LoBauerInnen (The Lobau Farmers)

Since 2012, about 60 CMA members have been cultivating a 4000 m² field and 500 m² greenhouse in Vienna's Lobau, using land rented from the city of Vienna. One reason the "LoBauerInnen" founded the association was to take responsibility of their diet and become independent of the food system. They stand for species diversity, try to collect their own seeds, host workshops, and enjoy experimenting. Anyone who would like to participate or learn more is welcome to contact the association or stop by the farm.

- **Address:** Naufahrtweg 14 (Greenhouses), opposite a 5000 m² field, 1220 Wien
- **Field Days:** Wed & Sun 10:00 – 16:00
- **Contact Information:**
 - **Email:** office@atelier7.at
 - **Web:** www.lobauerinnen.at
 - **Web:** <https://www.facebook.com/dielobauerinnen>

Paradiesgarten – Operation grüner Daumen (Operation green thumb)

The "Operation grüner Daumen" Association supports the spread of urban organic farming, and aims to promote the common good. They see active engagement with people and nature as a viable way to eliminate prejudice and counteract social anxiety. The association sees itself as a social, political, and educational community.

Members of the association have been cultivating a 1-hectare area in Lobau since 2014 – the "Paradiesgarten" (Garden of Paradise). Vegetables, fruits, and the communal area are jointly financed.

Paradiesgarten

- **Address:** Between Naufahrtweg and Schilfweg, 1220 Wien
- **Field Days:** Wed & Sun 10:00 – 16:00
- **Contact Information:** Michael Graner
- **Email:** kontakt@gruenerdaumen.org

CMA Seestadt

Due to widespread interest, a new community garden will be built for residents of Seestadt, under the "Community Made Agriculture" concept. Gardeners will manage the garden together, and then share in the harvest.

- **Address:** Between the dog park and the Opelwerk, 1220 Wien
- **Size of the Garden:** 1.000 m²
- **Contact Information:** District management Seestadt Aspern
 - **Email:** kirsten.foerster@meine.seestadt.info
 - **Web:** www.aspern-seestadt.at - CMA Seestadt

3.10 WWOOF – Volunteer on Organic Farms

The WWOOF Project (We're Welcome on Organic Farms) is for those who want a taste of organic farm life, rather than the responsibility of a farm for the whole season. After registering as a volunteer, anyone can go to work on a WWOOF farm, where food and housing are provided as payment. There are five farms in Vienna that offer this, for anyone interested.

WWOOF

- **Address:** Organic farms in the whole world
- **Sponsoring Organization:** WWOOF Österreich – Martina Almer
- **Participants:** All interested
- **Contact Information:**
 - **Email:** office@wwoof.at
 - **Web:** www.wwoof.at
 - **Telefon:** +43 (676) 50 51 639 (18-20 Uhr)

3.11 Guerilla Gardening

The motto of Guerilla Gardening is: "Why not use public spaces to for growing food and flowers, without asking in advance?" Established in 2009, this initiative is made up of an independent group of people committed to sustainability and community. Their garden beds are spread all over Vienna – essentially anywhere with a suitable patch of soil. One long-standing bed is located on Längenfeldgasse, for example. The garden is planted with vegetables of all kinds, and many of the neighbors come to help water the plants. This kind of gardening requires accepting setbacks, as beds could be turned into construction sites or parking lots without notice. Garden plans and environmental action are discussed at regular meetings, along with events and workshops for children. New faces are always welcome.

Guerilla Gardening

- **Address:** Empty public spaces around Vienna
- **Size of the Garden:** Varied
- **Sponsoring Organization:** Netzwerk KuKuMa

 - **Homepage:** <http://ggardening.blogspot.eu>

4 Provision of Local Vegetables

For city dwellers, there are even more ways to get fresh green produce. On one hand are the Vienna Food Markets, as well as farmer's markets from various gardens and farms, which offer fresh vegetables from Monday to Saturday. On the other hand, many organic farms offer fully-stocked "Bio-Kistl" (organic farm share boxes) that can be sent directly to your home every week. Most farms offer a variety of box sizes and produce types to choose from.

With its model of collective agriculture, Gärtnerhof Ochsenherz offers a season subscription to fresh vegetables, which can either come in a ready-packed box, or can be chosen from an assortment. With Food Cooperatives, members can self-organize and buy vegetables directly from local producers, and each cooperative looks different.

4.1 Organic Products of Austria

If you are looking for a direct link to local organic farms, the quickest way is at biomaps.at. Here you can find organic food, but also textiles, cosmetics, household goods, and even Christmas trees. The website also indicates how these products are distributed, such as home delivery, farm shops, organic catering service, or from a self-harvest field.

The website also offers additional information and services, like farm tours, farm holidays, and leisure activities.

Web: www.biomaps.at

4.2 Stadtlandwirtschaft Wien (Urban Agriculture in Vienna)

City and agriculture - two worlds that merge in Vienna: one sixth of the capital's area is used for agriculture today. Vienna lives and breathes urban agriculture. That means fresh products, grown just a few kilometers away. The app and homepage by "Stadtlandwirtschaft Wien" show you the most direct way to Viennese products – harvest-fresh and without detours. It helps you find the producers of vegetables, fruit, wine, honey, mushrooms, ornamental plants, and even snails, which are all cultivated and processed in Vienna. The app shows you where to shop directly from the farm, and can take you right to the nearest farmer's market.

App: <https://play.google.com/store/apps/details?id=wien.stadtlandwirtschaft.stadtlandwirtschaft>

Web: <http://stadtlandwirtschaft.wien/>

4.3 Solidarische Landwirtschaft (Community Supported Agriculture)

Community Supported Agriculture is based on a community of consumers who support a farmer with regular contributions, making the farmer less dependent on trade chains and less subject to natural hardships. This group of people finances the cost of a professional vegetable farm for one season or year, and receives local, high-quality, fresh produce – but also bears the risk of crop failure (from things like bad weather or pests). This concept is being implemented in and around Vienna by Gärtnerhof Ochsenherz and Biohof Radl.

CSA Biohof Radl

With a regular contribution, members can "rent" a piece of farmland (about 40 m²) to be managed by the Radl family. Every week, members are provided with produce from their farm share, which can be picked up either at the farm, or at the former BioVegan2Go shop in Vienna – kind and quality of the produce will depend on growing season and weather. Week by week, Biohof Radl offers the largest selection of seasonal, certified-organic vegetables. Members can choose between a full membership with 24 boxes of produce, or a partial membership with 12. Through informational material, community nights, and active cooperation in farm-work days, a sense of community is grown and strengthened at Biohof Radl.

CSA Biohof Radl

- **Membership Offer:** Agreement is valid for 1 Season – 12/24x weekly delivery of ready-packed produce box
Pausing delivery (e.g. for travel) and picking up farm share at another time is possible
- **Delivery Area:** Pickup-point in Vienna 7th District, or on the farm
- **Price:**
 - Full Membership (24 Boxes): 499 € /season (Mid-May – Mid/late November)
 - Partial Membership (12 Boxes): 290 € /season (Mid-May – Mid/late November)
 - Following the end of the membership during the season, additional weekly harvest shares can be purchased for € 20.79 (full members) or € 24.17 (partial members)
- **Events:**
 - Farm-work days
 - Community nights
 - Meetings
- **Contact Information:**
 - **Address:** Hirschstettner Straße 85, 1220 Wien
 - **Email:** info@biohof-radl.at
 - **Tel:** 0699 1 51 64 061
 - **Web:** www.biohof-radl.at/csa/
 - **FB:** www.facebook.com/BiohofRadl/?fref=ts

Gela - Gärtnerhof Ochsenherz

There are two ways to get involved with the Collective Agriculture Project at Ochsenherz garden market. First, members can sign up for a weekly delivery of ready-packed vegetable shares. Between spring and autumn, the farm team provides 26 boxes of produce to be picked up every Tuesday, and the pickup points are organized by harvest participants themselves. The produce boxes are available in 2 sizes (1 or 2 shares) and in the main harvest season, contain about 10 different types of vegetables, as well as herbs. Second, members have the option to pick-and-choose an assortment of vegetables at produce stand once a week. Participants enjoy helping out with the stand as another way to get involved.

Gela – Gärtnerhof Ochsenherz

- **Membership Offer:** Agreement is valid for 1 Season - 26x weekly delivery of ready-packed produce box, or 1x/week pick-and-choose assortment box
- **Delivery Area:** Currently 9 pickup-points in Vienna, or on the farm
- **Price:** 112 € per share/month
- **Events:**
 - Assistance days: March – October, every Wednesday from 9:00 – 17:00
 - Action days: March – October, every first Saturday of the month
 - Work group: Meets once a month
- **Contact Information:**
 - **Address:** Tannengasse 1/22, 2230 Gänserndorf
 - **Email:** gela@ochsenherz.at
 - **Homepage:** www.ochsenherz.at
 - **FB:** www.facebook.com/groups/ochsenherz/?fref=ts

4.4 Bio-Kisterl Providers with Delivery and Pickup in Vienna

Many organic farms offer "Bio-Kisterln," boxes of organic fruits and vegetables that can be delivered directly to your home. Most offer select box sizes and produce types, as well as the opportunity to choose your own vegetables. Delivery is usually divided by district on certain days of the week, and customers can choose if they want to receive their box weekly, or less often (not all suppliers). Almost all farms have a store or warehouse where customers can go to buy vegetables. There are currently six farms in Vienna listed by the "DIE UMWELTBERATUNG" (Environmental Counsel).

List of "Bio-Kisterln" Providers

(managed by DIE UMWELTBERATUNG):

www.umweltberatung.at/biokistl-anbieterinnen-aus-oesterreich

Biohof Adamah

post@jahbauer-biokiste.at
www.jahbauer-biokiste.at

4.5 Grocery Markets

Vienna has 17 permanent- and 5 temporary food markets. Permanent markets are held Monday through Saturday. Temporary markets are held weekly, and market stalls are only set up on certain days of the week.

The spectrum ranges from smaller markets, serving mainly locals, to large markets, which attract thousands of citizens and visitors week after week. Goods range from seasonal food directly from the producer, to delicacies from all over the world. Many markets also offer culinary shops, which invite customers to taste and experience the food.

(Source from: <https://www.wien.gv.at/freizeit/einkaufen/maerkte/lebensmittel/index.html>)

Permanent Markets

- Brunnenmarkt
- Floridsdorfer Markt
- Gersthofer Markt
- Hannovermarkt
- Johann-Nepomuk-Vogl Markt
- Karmelitermarkt
- Kutschkermarkt
- Meidlinger Markt
- Meiselmarkt
- Naschmarkt
- Nußdorfer Markt
- Rochusmarkt
- Schwendermarkt
- Sonnbergmarkt
- Viktor-Adler-Markt
- Volkertmarkt
- Vorgartenmarkt

Weekly Markets

- Temporary Markt Altgasse
- Temporary Bio-Markt Freyung
- Temporary Markt Freyung
- Temporary Markt in front of Mariahilf Church
- Temporary Markt Wacquantgasse
- Temporary Markt Stadlau

4.6 Food-Coops

Food Cooperatives are associations that self-organize the purchase and distribution of locally-produced, organic, and socially-just food. They see themselves as an alternative to the common food and agricultural system, and generally pursue a deliberate debate on the subject of nutrition. Food coops are organized by its members, so each one is a little different. Tasks such as picking up vegetables, typing the order list, loading services, managing the homepage, etc., are discussed at regular meetings and divided among members. Workshops and presentations help spread the idea, and occasional food excursions help members to meet and learn about producers. The extent of involvement is up to members themselves. Membership fees are collected for things like storage space, where everyone can pick up their food orders. The cooperatives are open to anyone interested. Further information, and a list of all Austrian food cooperatives can be found at www.foodcoops.at. There are currently 20 in Vienna:

FoodCoop Möhrengasse

- **Address:** Scholzgasse 13, 1020 Wien
