

Garteln in Wien (Gardening in Vienna)

Report on behalf of MA49

**Katharina Roth, Daniela Lehner, Gregory Manni
and Bernhard Kromp**

Vienna, November 2021

Overview

There are several ways to get fresh vegetables in Vienna. Renting a 20 - 80 m² garden plot and collaborating in a vegetable garden is one such option. Vegetable plots in Vienna are provided by various parties, such as the City of Vienna, "Selbsternte" (self-harvest), or the Central Association of Kleingärtner. In these rented garden spaces, tenants assume the care and harvest of a pre-existing plot, and are supported with expert advice, assistance, and equipment, depending on the location and provider. Every plot is farmed organically with annually rotated vegetables, and some also cultivate less common varieties. Because vegetable plot gardening does not yet have a common name, connecting gardeners with garden providers is difficult. Regardless, the demand for plots is so high that some providers are fully booked before the season begins before there is a chance to spread the word.

For those who are more interested in building communal relationships than growing their own vegetables, there are opportunities to participate in a range of community gardens - working together with people of different backgrounds and generations to create green spaces. In part, these projects are carried out by the Vienna Parks and Gardens (MA 42), Gebietsbetreuungen Stadterneuerung (Urban Renewal Office), and other organizations.

Even without the coordination of the Urban Renewal Office, people still find ways to grow and harvest fresh produce in Vienna. Examples include "Fruit in Public Spaces", in which public areas are cultivated and harvested independently. The initiative Meine.Deine.Gartenzeit (mine.your.garden time) connects people who want to share their gardening happiness. Those who only want to help selectively, can participate in "Community Made Agriculture" or work on a farm for food and lodging – Vienna offers these opportunities too.

For city dwellers, there are even more ways to get fresh green produce. On one hand are the Vienna Grocery Markets, as well as farms, which offer fresh vegetables from Monday to Saturday. On the other hand, many organic farms offer fully-stocked "Bio-Kistl" (organic farm share boxes) that can be sent directly to your home every week. If you are looking for a direct link to Austria's organic farms, the quickest way is at biomaps.at.

The model of community supported agriculture offers the possibility to be supplied with vegetables for one season by the market garden for a membership fee, either by means of a ready-packed box or by freely taking vegetables from a provided assortment. In Food Cooperatives, members can self-organize to buy vegetables directly from local producers. The organization of a food coop is determined by its members and can therefore look different. MILA, Austria's first participatory supermarket is currently being set up in Vienna.

Introduction

Gardening in the city is booming: more and more Viennese want to plant, cultivate, and harvest their own vegetables and consume fresh food, whether in rented garden plots, community gardens, or simply on an open spot of land.

This trend can be observed across Europe, and the City of Vienna is supporting the movement by offering consultation and organizational assistance. In 2016, the city extended its support of the "Garteln in Wien" (Gardening in Vienna) project, a service and information center for gardening and the provision of local vegetables, located at Bio Forschung Austria.

The hope is to supply the city population with fresh vegetables directly from community gardens in their district, and this plan is laid out in the following "red-green" government agreement (an agreement between the Social Democratic Party of Austria and the Green Alternative Party):

Neighborhood gardens will be supported - gardening together promotes social relationships and neighborhood connections within the districts. The aim is to install a community garden in each district. Cooperation in this area should also be found with schools, with the aim of establishing school gardens in each district (in cooperation with the Administrative Office for Education, Integration, Youth, and Human Resources (Geschäftsgruppe Bildung)).

Self-harvest fields give the citizens the opportunity to grow their own organic vegetables. The offer should be extended to private cooperation partners (other farmers with suitable land) in various regions of Vienna.

© Bio Forschung Austria

Municipal, semi-public, and Private Organizations

Gardening in the city is booming: more and more Viennese want to plant, cultivate, and harvest their own vegetables and consume fresh food, whether in rented garden plots, community gardens, or simply on an open spot of land.

["Garteln in Wien"](#) (Gardening in Vienna) has been set up by the city at [Bio Forschung Austria](#) as a new coordination and support center: city dwellers can learn where to grow their own food in Vienna, and where they can find fresh, locally-farmed produce.

Various departments of the city lease land to provide horticultural opportunities for city dwellers that do not own a private garden. Some examples include [MA 49 – Forestry Office and Urban Agriculture](#), which provide garden plots and some community gardens, and the [MA 28 – Road Administration and City Construction](#), which provides green spaces along the street for the "Gardening Around the Corner" ([Garteln ums Eck](#)) program. The [MA 42 – Vienna Parks and Gardens](#) sponsor a community garden in every district, lease parking spaces for community gardens, and also provide free assistance in answering [questions about plants](#).

In most districts, people in Vienna can contact the [Gebietsbetreuungen Stadterneuerung](#) (Urban Renewal Office) or the [Lokale Agenda 21 Wien](#) for help in implementing their own ideas for additional urban green spaces. In cooperation with the districts and the Vienna Parks and Gardens (MA 42), these offices help make public spaces greener. In implementing neighborhood gardens in municipal housing blocks, [Wohnpartner Wien](#) is available with advice and assistance. The [Gartenpolyog Association](#) supports the construction of community gardens and assists both new and existing garden groups with expertise in organization, group dynamics, and horticulture. The association also contributes to the promotion and networking of community gardens. As an authority on green buildings, the GrünStattGrau Research and Innovation GmbH is also at your disposal.

[The Umweltberatung](#) (Environmental Council) offers information and extensive visual material, such as brochures and posters, on a variety of ecologically relevant themes. One of their priorities is sustainable horticulture.

Bio Forschung Austria (Institute for Organic Research Austria)

Bio Forschung Austria is a non-university, non-profit research institute supported by the Forestry and Urban Agriculture Office of the City of Vienna (MA 49). The institute has taken an interdisciplinary approach to organic farming since 1979, and one of its basic principles is the use of its research in dialogue with organic farmers.

Fields of Research and Action:

- Soil as the basis of food production
- Site-specific organic varieties & crop rotation
- Preventative plant protection and natural pest regulation
- Climate and nature conservation in organic farming
- Educational work for rural and urban target groups
- Sustainable food provision for community consumption
- Organic agriculture and horticulture with social benefits

More information about the institute, current research projects, events, and educational offers can be found at bioforschung.at.

Garteln in Wien (Gardening in Vienna)

On May 30, 2016, the scope of organic research in Austria was expanded to include the service and information center for "gardening and the provision of local vegetables."

"Garteln in Wien" (Gardening in Vienna) is a coordination and support center set up by the city: city dwellers can learn where to grow their own food in Vienna, and also where they can find fresh, locally-farmed produce for purchase. The center offers guidance in establishing garden initiatives, such as first steps, legal forms, costs, points of contact, land, etc.

Another main focus of Bio Forschung Austria is teaching others how to garden: during the garden season, "Days of the Open Garden Door" are offered, as well as courses for beginners and experts, such as "Organic Gardening in Community". There are also educational offers and workshops for children and youth.

The Vienna Parks and Gardens (MA 42)

The Vienna Parks and Gardens are currently sponsoring a community garden in every district as part of a one-time payment. In order to receive this grant, the following requirements must be fulfilled: (1) the community garden must be organized as an association, (2) the approval of the district authority must be obtained, and (3) a valid contract must be completed with the landowner. With the verification of these requirements, the sponsor can request a grant as a community garden association. If the request is approved, the association has one year to establish its garden to be eligible for a maximum € 3,600 refund. Community gardens can both be built or improved with this grant funding, and these funding options are currently available in 4 districts.

Plant protection and gardening advice:

The staff of the Plant Protection Department advise on the following topics:

- Diseases and pests on plants inside and in the garden
- Current harmful organisms
- Organic crop protection
- General garden questions:
- Creating a compost heap
- Cutting fruit trees
- Propagation, cultivation and breeding of vegetables, perennials and summer flowers
- Current plant protection work in the Vienna parks
- Informative events of the Vienna City Gardens (video presentations, lectures, etc.)

The Vienna Parks and Gardens (MA 42)

Gebietsbetreuungen Stadterneuerung (Urban Renewal Office)

We are the Urban Renewal Office (Gebietsbetreuungen Stadterneuerung)

Vienna has practiced “soft urban renewal” since the 1970s, carefully renovating and upgrading districts by involving city residents. This approach aims is to create affordable housing and increase the quality of life.

The “[Gebietsbetreuungen Stadterneuerung](#)” (GB*) has maintained this method reliably for over 40 years. As a service center of Vienna, the GB offers a wide range of free services, including guidance, information, and project work at the district level.

Currently, the [GB* has five locations](#). They are an active hub in the region, and can answer questions about city residence, living environments, and living together in district communities. All contact details [can be found here](#).

Green Communities

Urban green spaces make the city livable and fulfill important ecological functions. The GB helps implement your ideas in making the city greener. City residents can plant in [Baumscheiben](#) (curb spaces) and other small free plots in their district, or they can become [community gardeners](#). In cooperation with the districts and Vienna Parks and Gardens (MA 42), the GB helps make public spaces more green.

Wohnpartner Wien

Do you want to beautify your community building with flower beds, or grow vegetables with your neighbors? Wohnpartner Wien is available for all questions regarding gardens in public housing. Every garden project is different, and Wohnpartner Wien offers individual assistance, tuned to the size and scope of a project. From initial ideas, to cost and funding options, to the finished garden, Wohnpartner teams are available for advice and assistance.

[Contact us](#), and learn about:

- General conditions, prerequisites, and approval procedures
- Assistance with channels of communication
- Assistance with organizational requirements
- Conducting informative events on site
- Existing garden projects in which Wohnpartner was/is involved
- Questions on acquiring grants and donations
- Advice and assistance on holding meetings and celebrations
- Horticultural questions (workshops, garden afternoons, etc.)
- Assistance in group dynamics
- Conflict prevention: assistance, from conflict resolution to mediation

Since 2011, Wohnpartner Wien has offered public housing residents the opportunity to start their own garden beds. It supports ambitious gardeners as well as beginners, from first steps to flourishing gardens and vegetable beds. There are several different [ways to garden, including flower beds, mobile beds, and community gardens](#).

Lokale Agenda 21 (Local Agenda 21)

Lokale Agenda 21 (Local Agenda 21) follows the principle of sustainable urban development. It offers city residents many different opportunities to shape their neighborhoods and districts, and gives them a say in changes large and small. The key members of Lokale Agenda 21 are dedicated citizens, district politicians, and the agenda office, which provides advice and support. The goal is to develop and implement projects together in dialogue to build a better quality of life.

For residents of Vienna that want to become active in community gardens, local food distribution, or other projects, Lokale Agenda 21 can help with networking, project development, and organizational matters, such as finding suitable land, getting permits, etc.

Lokale Agenda 21 is currently operating in ten districts of Vienna:

Innere Stadt
Landstraße
Wieden
Margareten
Neubau
Josefstadt
Alsergrund
Favoriten
Währing
Donaustadt
Liesing

DIE UMWELTBERATUNG Wien (Eco Counseling Vienna)

"DIE UMWELTBERATUNG" (Eco Counseling Vienna) is *the* primary center for ecological living and industry in Vienna, with information on topics from garbage to grasshoppers. In addition to gardening tips for the green thumb, "DIE UMWELTBERATUNG" environmental consultants instruct on gardening with organic methods, like how to stop garden pests, or help bees and other pollinators thrive. Other topics include organic plant protection and the selection of plants for gardens and small urban spaces, like a window box or a green facade. They also give practical tips on compost and mulch, as well as information for vegetable bed gardening, like organic seeds, plant mixes, and producing a rich harvest. They have recipes on preserving and cooking with herbs and fruits as well.

"DIE UMWELTBERATUNG" environmental consultants provide one-on-one advice on their **hotline: 01 803 32 32**. Their **website** has comprehensive information and brochures, as well as sources for organic gardening products: www.umweltberatung.at

The "biologisch GÄRTNERN" (organic gardening) seal of quality identifies plant protection products, fertilizers, and substrates that meet organic criteria. These can be found in the "biologisch GÄRTNERN" product database: biologisch-gaertnern.at

Gartenpolylog

The Gartenpolylog Association was founded in 2007 with the goal of popularizing communal gardening in Austria, implementing community gardens, and creating a network across Austria. Gartenpolylog works in three core areas:

Community Gardens

For the Gartenpolylog team, urban gardens are part of a social change. Its aim is to promote the idea of community gardens in Austria, and assist in their implementation. In Vienna, private clients, self-organized groups, and various city institutions construct community gardens together. Gartenpolylog helps these new garden groups with horticultural knowledge and organization during their first month.

Education

Community gardens are seen as diverse spaces for learning and action, which meet people where they are. Gartenpolylog aims to turn the possibility of communal gardening into a reality by offering courses on topics such as gardening techniques, compost, organization, and group dynamics, as well as excursions to various gardens. Its courses and consultation help provide a structure for research projects and partner collaboration, which promote learning in the community garden environment.

Network

Community garden initiatives are numerous and diverse. Gartenpolylog provides easy access to these initiatives and provides networking opportunities with an interactive [garden map](#), networking meetings, a newsletter, and an annual network conference. More information can be found on their homepage: <https://gartenpolylog.org/en>

Events: <https://gartenpolylog.org/en/events>

GrünStattGrau Research and Innovation GmbH

GrünStattGrau is: the holistic center for green development.

Making buildings green often sounds more complicated than it really is. As an authority center for green development, we are concerned with bringing people together to advance innovation and transformation. With the support of our network partners in business, science, and management, we would like to help you implement greenery in your interior, roof, or facade.

GrünStattGrau provides: know-how, tools, and infrastructure.

GrünStattGrau has the character of a laboratory, with expert advice, opportunities for collaboration in R&D, and exclusive service offers, as well as easy access to partners and infrastructure like online platforms, mobile test tracks, and other experimental spaces.

GrünStattGrau has: a comprehensive network of supporters.

With its partners in business, science, and management, and with growing collaboration in the cities of Vienna, Graz, St. Pölten, Linz, and Feldkirch — GrünStattGrau acts as Austria's ambassador for green development.

GrünStattGrau wants: to bring people together to drive implementation by sharing expertise.

As a promoter of innovation, GrünStattGrau pushes holistic strategies for climate change adaptation through green urban development in Europe.

GrünStattGrau is 100% owned by the non-profit Verband für Bauwerksbegrünung Österreich (Association for Green Urban Development, Austria).

Gardening

In Vienna, there are many possibilities for people without private gardens, and renting a 20 – 80 m² [Gemüsepachtparzelle](#) (vegetable plot) from an agricultural business is one of them. Tenants are chosen each gardening season, and are supported with expert advice, assistance, and equipment, depending on the location and provider. Every plot is farmed organically.

For those who are more interested in building communal relationships than growing their own vegetables, there are opportunities to participate in a range of [community gardens](#), to work together with people of different backgrounds and generations to create green spaces. In part, these projects are carried out by the [Gebietsbetreuungen Stadtneuerung](#) (Urban Renewal Office), [Agenda 21](#), [Gartenpolylog](#), and other organizations.

Those who want to contribute to improving the living environment can do so by sponsoring small green spaces (up to 50 m²) with the "Gardening Around the Corner" ([Garteln ums Eck](#)) program. In addition, there are creative garden initiatives in public places, which use vertical surfaces or home-made planters for gardening, as well as [initiatives just for children](#).

Even without the coordination of the Urban Renewal Office, people still find ways to grow and harvest fresh produce in Vienna. Examples include "[Fruit in Public Spaces](#)", in which public areas are cultivated and harvested independently. The initiative [Meine.Deine.Gartenzeit](#) (mine.your.garden time) connects people who want to share their gardening happiness.

Those who only want to help selectively (and leave the rest to the professionals), can participate in "[Community Made Agriculture](#)" or [work on a farm for food and lodging](#) – Vienna offers these opportunities too.

Gemüse-Pachtparzellen (Vegetable Plots for Rent)

For people, who want to only eat vegetables they grew themselves during the summer season, renting a 20 – 80 m² Gemüsepachtparzelle (vegetable plot) from an agricultural business is a good option. Vegetable plots in Vienna are provided by various parties, such as the City of Vienna, "Selbsternte" (self-harvest), or the Central Association of Kleingärtner, all using the same basic concept. Tenants pay an annual fee for a prepared vegetable plot with seeds and seedlings. In May the tenants take over and from that point on, they care for and harvest their plots on their own. Dependant upon the location and provider, they are supported with expert advice, assistance, and equipment. When the season ends in late October, the plots are returned. At these plots, certified organic farming is required of both the land-suppliers and the tenants. Because vegetable plot gardening does not yet have a common name, connecting gardeners with garden providers is difficult. Regardless, the demand for plots is so high that some providers are fully booked before the season begins, before there is a chance to spread the word.

Community Gardens

In community gardens, people of the neighborhood actively garden together. Here, vegetables, flowers, and community collaboration are given the opportunity to flourish. People of all ages and backgrounds meet and get to know each other—the joy of gardening brings fresh food and enriching connections. In some community gardens, intercultural gardening takes a central role, while others involve schools and kindergartens.

Most community gardens are intended for long-term use, but temporary spaces can be a great place for gardening too. Membership in an association which is recommended to be installed beforehand is required for most community gardens, but there are also gardens, where everyone is invited to participate. For example, all are welcome to stop by the Naschgarten in the 21st district to lend a helping hand or taste the garden's bounty.

The City of Vienna actively serves and financially supports the development of community gardens. To learn more, see "Organizations."

Gardening in Vienna Public Housing

Since 2011, Wohnpartner Wien has offered residents of public housing the opportunity to start their own garden beds. It supports ambitious gardeners as well as beginners, from first steps to flourishing gardens and vegetable beds. There are several different ways to garden, including flower beds, mobile beds, and community gardens.

Flower beds...

are small plant beds in the housing complex, maintained by individual residents.

Recommended:

- Enjoy plants and be ready to garden!
- Be willing to abandon fruits and vegetables

Mobile beds...

are raised beds placed in the housing courtyard at request, cared for by residents.

Recommended:

- Find neighbors to join in the work
- Set aside enough time for planting, maintenance, and harvest
- Be willing to look after a neighbor's garden or share a raised bed
- Be tolerant of garden damage, such as a missing vegetable or plant

Community gardens...

are spaces where residents of a housing complex can garden together.

Recommended:

- Involve neighbors who are enthusiastic gardeners like you
- Be willing to start a garden association
- Be ready to engage in group dynamics
- Be creative!
- Be open to diversity, different opinions, and outside perspectives

Wohnpartner Wien is available to assist with the garden approval process and community conflict prevention, as well as general advice.

Garteln ums Eck (Gardening Around the Corner)

Active residents, who want to enhance the surrounding biodiversity, can do so by caring for small green spaces (up to 50 m²) in their immediate neighbourhood with the "Garteln ums Eck" (= Gardening Around the Corner) program. Interested people contact the responsible urban renewal office. In a design agreement, the conditions that must be met when maintaining the area, such as not cultivating toxic plants or not to obstruct traffic, are laid down. The office contacts the municipal departments for gardening (who care about the green spaces usually) and road administration, who have to agree, before the gardening by the resident can start. The Gardening Around the Corner program is free of charge for the residents.

Urban Gardening at the Port of Vienna

The Port of Vienna offers plots for rent for the cultivation of vegetables and herbs. Soil preparation is carried out by the provider. However, the tenants must obtain their own seeds and young plants. The land is not certified organic. Therefore, planting and sowing of conventionally produced seeds is permitted here. This has the advantage that users are more or less free to arrange the cultivation on their land according to their needs and wishes.

- **Address:** Alberner Straße 21, 1110 Wien
- **Provider:** Hafen Wien
- **Size and Price:**
 - 50 m² € 155,-
 - 100 m² € 254,-
- **Harvest/Use Time:** April - October
- **Responsibility of the provider:**
 - Soil preparation
 - Wells for irrigation
- **Contact Information:**
 - **E-Mail:** urbangardening@hafenwien.com

Building Greenery

Building greening carries a crucial role in improving the city climate, as it serves many helpful functions. In tight living situations where green is lacking and land is in high demand, green roofs and facades raise the quality of life and have a positive impact on wellbeing and health.

Well-designed, species-rich, green spaces give animals and insects more room to live within the city, playing an important role in urban biodiversity, as well as raising the aesthetic and physical worth of a property. These spaces also create large drainage and storage areas for rainwater, and as water evaporates across plants and substrates, the surrounding air cools, reducing the city's thermal pollution. They are also resistant to extreme heat and cold, which lengthens the life of the buildings they rest upon. Urban greenery can be applied and constructed in many ways, so there are solutions that either cost little, or are extensive in their maintenance.

As the center for green urban development, GrünStattGrau Research and Innovation GmbH is available to help with any urban greening projects.

Garden Initiatives for Children

Practice starts early for those who want to become urban gardeners!

There are a few initiatives, made especially for children, which provide the opportunity for hands-on learning in the garden.

There are other opportunities for children too, such as "[Eule Wien](#)" (Owl Vienna) or "[Schule am Bauernhof](#)" (School on the Farm).

Kinder-Garten! Pädagogikgarten (Education Garden)

Practice starts early for those who want to become urban gardeners! In this garden program, kids learn that plants need time and care to grow into ripe, delicious food. But the highlight for these little gardeners is always the harvest: when the vegetables can be tasted, herbs gathered, and berries picked, patience is finally rewarded!

The Pädagogikgarten (educational garden) is an ideal opportunity for children of the city to see where fruit and vegetables come from, and to learn how they arrive on our table. Come visit the garden and enjoy the flourishing garden beds!

Kinder-Garten! - Pädagogikgarten

- **Address:** Schütte-Lihotzky-Park, 1050 Wien
- **Size:** 5 children's raised beds
- **Sponsorship:** GB*East, Bezirksvorstehung, MA 42
- **Established:** 2015
- **Participants:** Childrens groups from KIWI, Kleiner Stern Abendstern
- **Plants:**
 - Vegetables, herb, and flower beds
- **Events:**
 - Spring festival
- **Contact Information:**

NASCH – Natur als Schule (nature as school)

Two trained educators come to the children in schools, kindergartens and families to create and garden areas together. Nature experience areas for children made by children themselves.

Examples of offers:

- Building raised beds, laying out and planting soil beds - handicraft and gardening
- Depending on age, learn interesting facts, listen to songs and stories, be independent and learn by doing research
- Consider, sketch and create garden areas
- Creating habitat for native animals and plants and of course for children

Contact Information:

- DI Johanna Biesenbender, landscape planner and kindergarten teacher
- Mag. Silvia Schachinger, teacher and mathematician
- **E-Mail:** post@naturalsschule.at
- **Web:** www.naturalsschule.at
- **Tel:** 0699-10849513

City Farm Augarten

After 5 successful years in Schönbrunn, the City Farm was terminated at its location. As an alternative, they have been offered buildings and garden areas in Vienna's Augarten in the 2nd district. More than 4,000 m² of urban open space offer all the prerequisites for a unique urban living and learning garden, managed according to the principles of organic farming. Children's and theme beds are linked by the path of vegetable diversity, where countless species and varieties grow, that can not be bought in any supermarket. There is a wide spectrum of garden programs for children, teenagers, and adults year-round.

City Farm Augarten

- **Address:** Obere Augartenstraße 1C, 1020 Wien
- **Sponsorship:** City Farm Augarten – Verein zur Förderung aviable from Urban Gardening, Gartenpädagogik und ökologischer Bildung (Association for the Promotion of Urban Gardening, Garden Education, and Ecological Education)
- **Target Groups:** Adults, children, families, school classes, kindergartens, and teachers
- **Gardening Season:** year-round
- **Events, offers, and other info:**
 - Programs for adults, children, families, school classes, kindergartens, and teachers
 - Raritätenbörse ("Treasure Fair")

NALELA – Space for Knowledge and Nature

Nalela is an educational workshop on a farm in the middle of Lobau. It is a place for people of all ages who seek to learn from nature—such as getting up close to farm animals, or producing natural cosmetics.

NALELA – Place for Knowledge and Nature

- **Address:** Naufahrtweg 14, 1220 Wien
- **Gardening Season:** year-round, dates by appointment
- **Duration:** 2 to 3 hours (workshops), all day (farm holidays)
- **Target Groups:** Kindergartens, children's groups, families, adults, and seniors
- **Events, offers, and other info:**
 - Many different workshops for every target group
 - All-day support during Summer, Easter, and semester holidays
 - Birthday parties
- **Contact Information:**
 - **Email:** info@nalela.at
 - **Web:** www.nalela.at
 - **Tel:** 0681 / 818 508 86

Experience diversity in the garden of BIO FORSCHUNG AUSTRIA

What do plants eat? How deep do roots reach into the soil? What does "organic" mean? In "Garten der Vielfalt" (Garden of Diversity), students learn about the amazing wealth of edible plants. Depending on the season and program, students can plant or harvest peas, smell culinary herbs, taste tomatoes, or dig up potatoes to take home. There are about 200 different species of plants to admire.

A healthy variety of vegetables needs a rich soil life: educational stations show the movement of earthworms, microscopic microbial communities, and the secret underground life of plants in the "Wurzelschaugarten" (Root Garden).

Experience the foundations of our diet in the organic garden!

Garten der Vielfalt (Garden of Diversity)

- **Address:** Esslinger Hauptstr. 132-134, 1220 Wien
- **Size:** ca. 1,5 ha
- **Supervised by:** Bio Forschung Austria
- **Gardening Season:** April-October, Monday to Friday – dates by appointment
- **Duration:** about 2 hours for elementary schools, and 3 hours for students above 5th grade
- **Target Groups:** Students aged 5-18, as well as **children and adults!**
- **Cultivated Plants:**
 - Fruit, vegetables, cereals, herbs, plants for promoting pollinators, green spaces
- **Events:**
 - Tage der offenen Gartentüre – Day of the Open Garden Door
 - Organic gardening course
 - Tag der Artenvielfalt – Biodiversity Day

Fruit in Public Spaces

The association "ObstStadt Wien" (Fruit City Vienna) plants fruit trees in the city together with committed people, promotes, cultivates and multiplies fruit for all. Fruit tree patrons plant trees and care about them as long as they are young and need irrigation. Everybody can come and harvest according to the fair use principle. The concept was brought to Vienna in 2018 by the partner organisations ObstStadt Wien, Lokale AgendaDonaustadt (Local Agenda 21) and Ökosoziales Forum Wien. Together with the district administration of the 22nd district and the MA 45 - Wiener Gewässer, the first fruit trees could be planted on the "Donauinsel", an inundation dam with great participation of the population. There are either 2 online tools (Mundraub & Fruchtfliege), which map publicly accessible fruit trees with Google Maps and publishes their locations. The sites of wild, unused, or public fruit trees, berries, and herbs can be registered and accessed by any user on an interactive map. Some basic rules call for respecting private property, taking care not to harm the trees and the surrounding flora and fauna. Since launching in 2009, more than half a million people have accessed the site, and several hundred are actively working on the online fruit tree map.

Community Made Agriculture (CMA)

"Community Made Agriculture" is a special form of collective agriculture. Here, people try to subsist on their own garden of vegetables, herbs, and sometimes even fruit, and also use the garden as a political and socio-economic statement. The CMA motto is, "do not live at the expense of others! – not at the expense of nature, and not at the expense of people in low-wage countries."

The owner of the farmland is only involved in this form of solidarity farming through the land tenancy, and sometimes infrastructure, such as greenhouses, access to water, etc. CMAs are organized like community gardens, but produce food both for sale and for personal use.

In order to grow vegetables as efficiently as possible, all plants of one kind are put into the same bed, sometimes in a system of mixed crops. For example, one plant bed might only be used for onions and carrots for the whole community. Members share the responsibility of garden care by choosing the specific vegetables they wish look after for the entire season, and the more responsibility a member takes on, the more they get to harvest.

LaaerBergbauern – Eco-social agriculture at Laaer Berg in Vienna

A CMA was established at Laaer Berg in 2017, where local organic vegetables are produced through community work and division of labor. Laaer Berg farmers want members to contribute ecologically, politically, and socially through meaningful participation and responsibility as "prosumers" on a piece of land. Together, the community creates a beautiful place for the whole family, where people can engage in healthy outdoor activity. Anyone interested can become members, adopt a tree, or participate in intercultural exchanges, such as sightseeing tours, field days, and festivals.

Wilde Rauke

"Gemeinsame Landwirtschaft Wilde Rauke" (Wilde Rauke Collective Agriculture) is a self-organized community garden in Stammersdorf. At a picturesque location on the Marchfeld Canal, the members work sustainably and organically on one hectare of land, where a variety of vegetables and fruits are harvested. Working together is one special feature of the community garden: from soil cultivation to seeding, plant care, watering, and harvesting — everything is done as a community.

- **Address**

Vereinslokal: Cordobaplatz 1/5/27, 1210 Wien

Neu-Stammersdorf, zwischen Orasteig und Marchfeldkanal, 1210 Wien

- **Size of the Garden:** 10.000 m², ca. 3.000 m² vegetable cultivation, 1.500m² meadow orchard with 30 Fruit-trees, 1.500 m² brownfields, 4.000 m² winter rye as mulch material

- **Established:** May 2012

- **Contact Information:**

- **Email:** wilderauke@gmx.at

- **Web:** www.woof.at

- **Tel:** 0699 199 072 60

Die LoBauerInnen (The Lobau Farmers)

Since 2012, about 60 CMA members have been cultivating a 4000 m² field and 500 m² greenhouse in Vienna's Lobau, using land rented from the city of Vienna. One reason the "LoBauerInnen" founded the association was to take responsibility of their diet and become independent of the food system. They stand for species diversity, try to collect their own seeds, host workshops, and enjoy experimenting. Anyone who would like to participate or learn more is welcome to contact the association or stop by the farm.

Die LoBauerInnen

- **Address:** Naufahrtweg 14 (Greenhouses), opposite a 5000 m² field, 1220 Wien

- **Size of the Garden:** 4000 m²

- **Established:** 2012 The Grünstern- Lobau Farmers / 2014 The Lobau Farmers

- **Field Days:** Wed & Sun 10:00 – 16:00

- **Contact Information:**

- **Email:** info@lobauerinnen.at

- **Web:** www.lobauerinnen.at

- **Web:** <https://www.facebook.com/dielobauerinnen>

- **Tel:** 0664 611 01 06

Barangay Center Austria

Since 2016 the association „Barangay Center Austria“ promotes the integration and well-being of refugees from the Philippines by running a special type of community supported agriculture (known as Community Made Agriculture) in Vienna. By now 25 families enjoy working together in the Lobau area. Their focus is to cultivate herbs and vegetables from the Philippines as well as wild varieties (österr. oderzusätz philippinische?). Additionally cooking, eating and celebrating is part of this community. All income is used to fund a school programme for children of indigenous Filipinos who were displaced by the government and large corporations.

While the main emphasis is on scientific and organic farming, young people are able to learn about their human rights and defend them.

Barangay Center Austria

- **Address:**

Office of the Association: Jedlersdorferstr. 99/17/8, 1210 Wien,
opposite Naufahrtweg 14, 1220 Wien

- **Size of the Garden:** 2.130 m²,

- **Established:** 2010 Association / 2016 field in the Lobau

- **Contact Information:**

- **Email:** unlayaocristy@gmail.com
- **FB:** www.facebook.com/BarangayCenter
- **Tel:** 0669 150 512 94

Paradiesgarten – Operation grüner Daumen (Operation green thumb)

The "Operation grüner Daumen" Association supports the spread of urban organic farming, and aims to promote the common good. They see active engagement with people and nature as a viable way to eliminate prejudice and counteract social anxiety. The association sees itself as a social, political, and educational community.

Members of the association have been cultivating a 1-hectare area in Lobau since 2014 – the "Paradiesgarten" (Garden of Paradise). Vegetables, fruits, and the communal area are jointly financed.

Paradiesgarten

- **Address:** Between Naufahrtweg 14 and Schilfweg 28, 1220 Wien

- **Size of the Garden:** 10.000 m²

- **Established:** 2012 / since 2014 the field in the Lobau

- **Contact Information:**

- **Email:** Contact.Information@gruenerdaumen.org
- **FB:** <https://www.facebook.com/OperationGruenerDaumen>
- **Tel:** 0676 695 44 88

Gemeinschaftsgarten Kraut & Blüten

Due to widespread interest, a new community garden was built for residents of Seestadt, under the "Community Made Agriculture" concept. Gardeners will manage the garden together, and then share in the harvest.

CMA Seestadt

- **Address:**
Office: Simone-de-Beauvoir Platz 1/3/12, 1220 Wien
Seestadt Aspern Madame d'Ora Park, 1220 Wien
- **Size of the Garden:** 1.000 m²
- **Established:** 2018
- **Contact Information:**
 - **Email:** kraut-und-blüten@qmx.at
 - **Web:** www.aspern-seestadt.at – CMA Seestadt
 - **FB:** www.facebook.com/krautundblueten/
 - **Tel:** 0660 456 99 78

Share Garden

Meine.Deine.Gartenzeit - initiative brings together people with and without gardens

Gardens have been considered a privilege not only since the beginning of the crisis. They combine tranquility, nature and the private sphere. The Austria-wide initiative Meine.Deine.Gartenzeit (mine your garden time) wants to share garden happiness and brings people with and without gardens together.

The principle is quite simple: some offer a garden on time, the others look for one. Prerequisite for it is only a registration on the platform www.gartenteilen.at. The first contact is made anonymously, if desired. The two parties decide when and in what form they want to exchange data and what the next steps are. This is completely individual; people work it out directly.

First and foremost, it's about spending time in the garden. Whether visitors are also allowed to exercise their green thumbs, and if so, how and where exactly, is agreed on an individual basis. That's why it makes sense for host and guest to discuss the rules in advance that will help them both to feel comfortable.

The most important rules when sharing a garden:

- Voluntary, no commercial purpose
- Target radius: maximum 20 kilometers from your own home
- Number of participants per garden: max. 4 people from one household
- Minimum age: 18 years
- First getting to know each other in an anonymous chat
- Self-determined data exchange
- Individual garden rules/agreements
- Personal contact via window chat or short exchange with distance

WWOOF – Volunteer on Organic Farms

The WWOOF Project (World Wide Opportunities on Organic Farms) is for those who want a taste of organic farm life, rather than the responsibility of a farm for the whole season. After registering as a volunteer, anyone can go to work on a WWOOF farm, where food and housing are provided as payment. There are five farms in Vienna that offer this, for anyone interested.

WWOOF

- **Address:** Organic farms in the whole world
- **Sponsoring Organization:** WWOOF Österreich – Martina Almer
- **Participants:** All interested
- **Contact Information:**
 - **Email:** office@wwoof.at
 - **Web:** www.wwoof.at
 - **Telefon:** +43 (676) 50 51 639 (18-20 Uhr)

Provision of Local Vegetables

For city dwellers, there are even more ways to get fresh green produce. On one hand are the [Vienna Grocery Markets](#), as well as [farms, which offer fresh vegetables from Monday to Saturday](#). On the other hand, many organic farms offer fully-stocked "Bio-Kistl" (organic farm share boxes) that can be sent directly to your home every week. Most farms offer a variety of box sizes and produce types to choose from. If you are looking for a direct link to Austria's organic farms, the quickest way is at [biomaps.at](#).

The model of [community supported agriculture](#) offers the possibility to be supplied with vegetables for one season by the market garden for a membership fee, either by means of a ready-packed box or by freely taking vegetables from a provided assortment. In [Food Cooperatives](#), members can self-organize to buy vegetables directly from local producers. The organization of a food coop is determined by its members and can therefore look different. [MILA, Austria's first participatory supermarket](#) is currently being set up in Vienna.

Organic Products of Austria

If you are looking for a direct link to local organic farms, the quickest way is at biomaps.at. Here you can find organic food, but also textiles, cosmetics, household goods, and even Christmas trees. The website also indicates how these products are distributed, such as home delivery, farm shops, organic catering service, or from a self-harvest field. The website also offers additional information and services, like farm tours, farm holidays, and leisure activities.

Web: www.biomaps.at

Stadtlandwirtschaft Wien (Urban Agriculture in Vienna)

City and agriculture - two worlds that merge in Vienna: one sixth of the capital's area is used for agriculture today. Vienna lives and breathes urban agriculture. That means fresh products, grown just a few kilometers away. The app and homepage by "Stadtlandwirtschaft Wien" show you the most direct way to Viennese products – harvest-fresh and without detours. It helps you find the producers of vegetables, fruit, wine, honey, mushrooms, ornamental plants, and even snails, which are all cultivated and processed in Vienna. The app shows you where to shop directly from the farm, and can take you right to the nearest farmer's market.

App: <https://play.google.com/store/apps/details?id=wien.stadtlandwirtschaft.stadtlandwirtschaft>

Web: <http://stadtlandwirtschaft.wien/>

Solidarische Landwirtschaft (Community Supported Agriculture)

Community Supported Agriculture is based on a community of consumers who support a farmer with regular contributions, making the farmer less dependent on trade chains and less subject to natural hardships. This group of people finances the cost of a professional vegetable farm for one season or year, and receives local, high-quality, fresh produce – but also bears the risk of crop failure (from things like bad weather or pests). This concept is being implemented in and around Vienna by Gärtnerhof Ochsenherz and Biohof Radl.

CSA Biohof Radl

With a regular contribution, members can "rent" a piece of farmland (about 40 m²) to be managed by the Radl family. Every week, members are provided with produce from their farm share, which can be picked up either at the farm, or at the former BioVegan2Go shop in Vienna – kind and quality of the produce will depend on growing season and weather. Week by week, Biohof Radl offers the largest selection of seasonal, certified-organic vegetables. Members can choose between a full membership with 24 boxes of produce, or a partial membership with 12. Through informational material, community nights, and active cooperation in farm-work days, a sense community is grown and strengthened at Biohof Radl.

CSA Biohof Radl

- **Membership Offer:** Agreement is valid for 1 Season – 12/24x weekly delivery of ready-packed produce box
Pausing delivery (e.g. for travel) and picking up farm share at another time is possible
- **Delivery Area:** Pickup-point in Vienna 7th District, or on the farm
- **Price:**
 - Full Membership (24 Boxes): 499 € /season (Mid-May – Mid/late November)
 - Partial Membership (12 Boxes): 290 € /season (Mid-May – Mid/late November)
 - Following the end of the membership during the season, additional weekly harvest shares can be purchased for € 20.79 (full members) or € 24.17 (partial members)
- **Events:**
 - Farm-work days
 - Community nights
 - Meetings
- **Contact Information:**
 - **Address:** Hirschstettner Straße 85, 1220 Wien
 - **Email:** info@biohof-radl.at
 - **Tel:** 0699 1 51 64 061
 - **Web:** biohof-radl.at/csa/
 - **FB:** facebook.com/BiohofRadl

Gela - Gärtnerhof Ochsenherz

There are two ways to get involved with the Collective Agriculture Project at Ochsenherz garden market. First, members can sign up for a weekly delivery of ready-packed vegetable shares. Between spring and autumn, the farm team provides 26 boxes of produce to be picked up every Tuesday, and the pickup points are organized by harvest participants themselves. The produce boxes are available in 2 sizes (1 or 2 shares) and in the main harvest season, contain about 10 different types of vegetables, as well as herbs. Second, members have the option to pick-and-choose an assortment of vegetables at produce stand once a week. Participants enjoy helping out with the stand as another way to get involved.

Gela – Gärtnerhof Ochsenherz

- **Membership Offer:** Agreement is valid for 1 Season - 26x weekly delivery of ready-packed produce box, or 1x/week pick-and-choose assortment box
- **Delivery Area:** Currently 9 pickup-points in Vienna, or on the farm
- **Price:** 112 € per share/month
- **Events:**
 - Assistance days: March – October, every Wednesday from 9:00 – 17:00
 - Action days: March – October, every first Saturday of the month
 - Work group: Meets once a month
- **Contact Information:**
 - **Address:** Tannengasse 1/22, 2230 Gänserndorf
 - **Email:** gela@ochsenherz.at
 - **Homepage:** www.ochsenherz.at
 - **FB:** www.facebook.com/groups/ochsenherz/?fref=ts

Ackerschön

Solawi Ackerschön has been supplying households in Vienna and Hasendorf with fresh vegetables all year round since the beginning of 2018. A large variety of vegetables are grown on the 5ha farm, which is home to about 100 members of the association.

- **Offer:** agreement valid for one season from February
- **Price:** 118€ per month (for 2020/21)
- **Delivery area:** Servitenplatz, 1090 Vienna or ex Hof.
- **Events:**
 - Workdays (currently every 4th Saturday of the month)
 - Seasonal festivals
- **Contact Information:**
 - **Address:** Hasendorf 51, 3454 Sitzenberg-Reidling, Lower Austria
 - **Email:** info@ackerschön.at
 - **Tel:** 0699 18125052
 - **Web:** <http://www.ackerschön.at/>

Ouvertura

Ouvertura is a young solidarity agriculture in Moosbrunn, Lower Austria. In order for good food and an intact nature to be there for everyone, agriculture needs freedom, which it cannot take away in the global price war. Therefore the farm has left the market economy and now finances itself together with all the people it feeds. Sharing the harvest is shared fairly among them.

Each member chooses the financial contribution himself. Because fairness does not come about by treating everyone equally, but by creating equal conditions for everyone.

The food can be picked up in ready-packed boxes at pick-up points in Vienna, Mauer, Mödling, Gänserndorf and Moosbrunn. If you prefer to put together your own box, the "Free removal area" near the Naschmarkt is the best place to go.

- **Offer:** Boxes with seasonal food (delivery every second Tuesday) or "Free removal" at Kettenbrückengasse 2/3, 1060 Vienna (since March 2020, every second Friday)
- **Delivery area:** 10 collection points in Vienna, 2 in Mödling, 2 in Gänserndorf and one each in Enzersdorf and Moosbrunn
- **Price:** 90€/month or 1080€/Year, approx. 60€ tree sponsorship
- **Events:**
 - Spring and harvest festivals
 - Action days and workshops
 - weekly working group meetings
- **Contact Information:**
 - **Adress:** Prügelweg in 2441 Mitterndorf an der Fischa
 - **Email:** office@ouvertura.at
 - **Homepage:** <https://www.ouvertura.at>

Bio-Kisterl Providers with Delivery and Pickup in Vienna

Many organic farms offer "Bio-Kisterln," boxes of organic fruits and vegetables that can be delivered directly to your home. Most offer select box sizes and produce types, as well as the opportunity to choose your own vegetables. Delivery is usually divided by district on certain days of the week, and customers can choose if they want to receive their box weekly, or less often (not all suppliers). Almost all farms have a store or warehouse where customers can go to buy vegetables. There are currently more than 15 farms in Vienna listed by the "DIE UMWELTBERATUNG" (Environmental Counsel).

Grocery Markets

Vienna has 17 permanent- and 5 temporary food markets. Permanent markets are held Monday through Saturday. Temporary markets are held weekly, and market stalls are only set up on certain days of the week.

The spectrum ranges from smaller markets, serving mainly locals, to large markets, which attract thousands of citizens and visitors week after week. Goods range from seasonal food directly from the producer, to delicacies from all over the world. Many markets also offer culinary shops, which invite customers to taste and experience the food.

(Source from: <https://www.wien.gv.at/freizeit/einkaufen/maerkte/lebensmittel/index.html>)

Permanent Markets

- Brunnenmarkt
- Floridsdorfer Markt
- Gersthofen Markt
- Hannovermarkt
- Johann-Nepomuk-Vogl Markt
- Karmelitermarkt
- Kutschkermarkt
- Meidlinger Markt
- Meiselmarkt
- Naschmarkt
- Nußdorfer Markt
- Rochusmarkt
- Schwendermarkt
- Sonnbergmarkt
- Viktor-Adler-Markt
- Volkertmarkt
- Vorgartenmarkt

Weekly Markets

- Temporary Markt Altgasse
- Temporary Bio-Markt Freyung
- Temporary Markt Freyung
- Temporary Markt in front of Mariahilf Church
- Temporary Markt Wacquantgasse
- Temporary Markt Stadlau

Food-Coops

Food Cooperatives are associations that self-organize the purchase and distribution of locally-produced, organic, and socially-just food. They see themselves as an alternative to the common food and agricultural system, and generally pursue a deliberate debate on the subject of nutrition. Food coops are organized by its members, so each one is a little different. Tasks such as picking up vegetables, typing the order list, loading services, managing the homepage, etc., are discussed at regular meetings and divided among members. Workshops and presentations help spread the idea, and occasional food excursions help members to meet and learn about producers. The extent of involvement is up to members themselves. Membership fees are collected for things like storage space, where everyone can pick up their food orders. The cooperatives are open to anyone interested. Further information, and a list of all Austrian food cooperatives can be found at www.foodcoops.at. There are currently 34 in Vienna:

MILA – participatory supermarket

Austria's first participatory supermarket is currently being set up in Vienna. MILA, the participatory supermarket, will offer low-priced, high-quality food to all members. The members determine the assortment according to their preferences and values. MILA offers the full assortment and the opening hours of a conventional supermarket. However, through purchasing, we will pursue respectful relationships with producers, regionality, environmental protection, animal welfare, as well as the diversity of the members' needs.

In addition to organic, regional and hand-produced food, we sell products that can be found in traditional supermarkets, as well as special products requested by members. In order to offer affordable but fair prices, MILA plans to reduce paid labor to the minimum necessary. This is easily possible if all members work in the supermarket for three hours every four weeks. At the same time, this strengthens the idea of MILA – as a social place of doing business together, reviving the traditional meaning of the market as a place of meeting and where everyone is welcome to participate. As a cooperative, MILA will belong to its members and they can shape it themselves. MILA will be a self-organized space where people work together on an equal footing. Decisions will rest democratically with all cooperative members. According to the principle: one person – one vote. The amount of the cooperative contribution will be staggered so that all interested people, regardless of their own financial means, can participate.

For MILA to become a reality soon, it needs the commitment and enthusiasm of as many people as possible. In order to support the foundation of the cooperative and to open the participatory supermarket together, you can now become a member of MILA.

Here is the link to the MILA – participatory supermarket website: www.mila.wien/de/

Garden of Diversity (Bio Forschung Austria)

In the "Garden of Diversity" of Bio Forschung Austria, interested parties can get to know the amazing wealth of food plants. Around 200 different varieties of food plants of various species can be admired here over the course of the year. In addition, species-rich meadows and fallow land, hedges of native woods, deadwood objects, nesting aids and a newly created wetland biotope form the basis for species diversity in a confined space. A special highlight is also a visit to the root arena. Along a 3 m wide and 2.5 m deep glass pane the root system of various plants can be observed. We invite you to get to know the secret underground life! Let us inspire you!

European green toad biotope

At the end of November/beginning of December 2017, a wetland biotope was established on the BFA site to support the green toad. This project was financed by the MA 22 and we have documented for you how life in and around the pond (plants and animals) has developed over the past year.

A review of the year 2018 can be found here:

<https://www.bioforschung.at/biotop/biotop-2018/>

Further information about the biotope and the green toad can be found here:

<https://www.bioforschung.at/wechselkroetenbiotop-in-der-bio-forschung-austria/>
